Domain of Expertise

Software Solutions

Precision software tailored to your success

Wish Work offers bespoke software solutions that seamlessly integrate with your distinct business needs and aspirations.
From e-commerce platforms to e-health platforms, Wish Work possesses the expertise to architect and implement software solutions that cultivate growth and operational excellence.

We will help you:

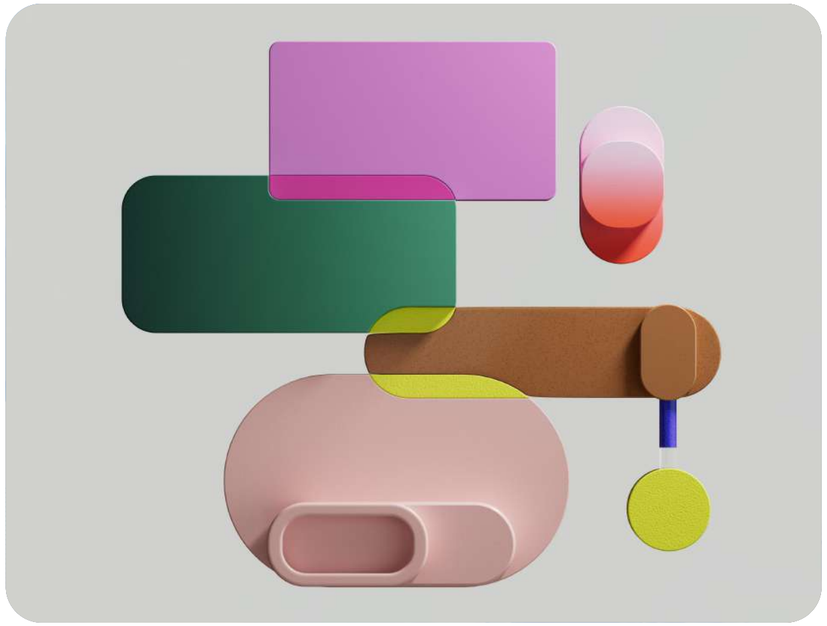

01 **Uncover** and **address** your unique business challenges

02 **Design**, **develop**, and **deploy** a custom software solution tailored to your specific needs

03 **Implement** and **integrate** your software solution smoothly into your existing infrastructure

04 Provide ongoing **support** and **maintenance**

05 Achieve your **business goals** and **strategic objectives**

Design Solutions

Designing impactful experiences

Wish Work approaches design comprehensively and helps businesses convey their message with visual language. Moreover, It creates unique experiences for the software products in any medium.We'll help you design experiences that are both engaging and meaningful, leaving a lasting impression on your customers and stakeholders.

We will help you:

01 Create seamless **brand identities**

02 Design stunning **digital interfaces** and **experiences (UI/UX)**

03 Produce engaging **motion graphics** and **micro animations** for your product

04 Create compelling **icons** and **visual assets** for your digital presence

05 Design harmonious **packaging** for your product

AI Solutions

Build, deploy, and leverage AI with Wish Work

Powered by a multidisciplinary team of creatives and engineers, Wish Work AI is your implementation partner, building and deploying custom pre-trained models, empowering data science teams, and integrating AI into pioneering creative and product experiences.

We will help you:

01 Conceptualize and define your **AI goals**

02 Develop and train **custom AI models**

03 Deploy and **integrate AI** into your workflows

04 Monitor and **optimize AI performance**

05 Extend your AI capabilities through **partnerships**

03

Industries

Health Care

Wish Work empowers healthcare organizations to enhance patient care, streamline operations, and achieve their strategic goals through tailored software solutions

E-Commerce

Wish Work empowers e-commerce businesses to create seamless and engaging online shopping experiences that drive customer satisfaction and revenue growth

Fintech

Wish Work collaborates with fintech companies to build innovative and secure software solutions that facilitate financial transactions, enhance customer experiences, and foster financial inclusion

- Industries

Creative

Wish Work partners with creative agencies and businesses to develop innovative and user-centric software solutions that empower their creative processes and enhance their offerings

Real Estate

Wish Work has been involved in complex e-real-state solutions and model complex processes of rental problems into the software world.

Multi-sided Platform

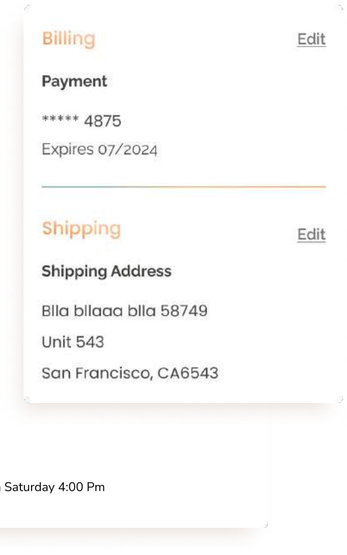

Wish Work partners with creative agencies and businesses to develop innovative and user-centric software solutions that empower their creative processes and enhance their offerings

Peachlyfe

Peachlyfe.com

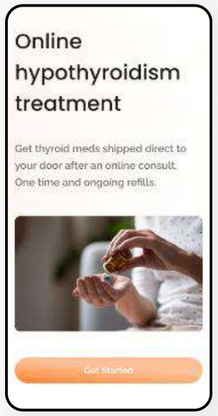

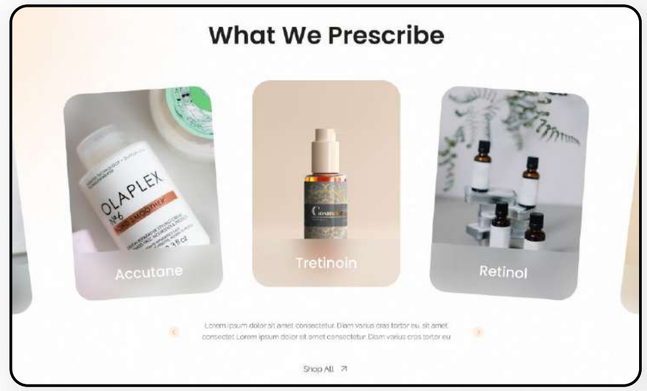

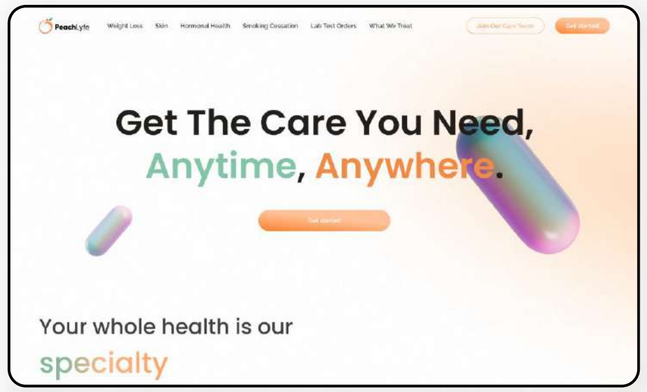

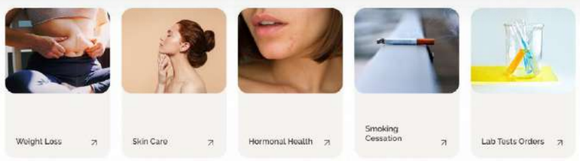

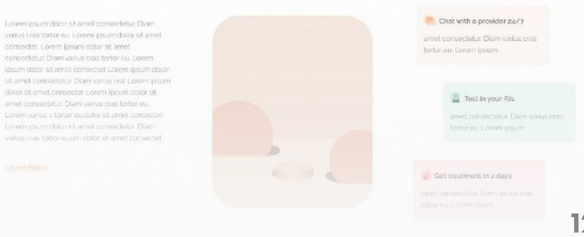

Peachlyfe: A Comprehensive E-Health Platform Specializing in Health Coaching

PeachLyfe redefines healthcare by offering a seamless blend of modern convenience and holistic well-being. Their mission is to provide easy and swift access to medication all within our custom-made EHR. Their platform empowers patients by offering features like e-prescriptions and secure access to their medical records. Additionally, PeachLyfe connects patients to a vast network of pharmacies across the United States, ensuring medication access is convenient and efficient.
To ensure a successful market entry, we conducted a thorough review and analysis of the current healthcare landscape. This in-depth research allowed us to strategically define the core functionalities of PeachLyfe.

Problem

1. **Slow and inefficient communication between doctors and patients.**
2. **Rigid forms couldn't capture the full range of patient needs.**
3. **No system for health coaches (non-medical staff) to track patient progress.**
4. **Manual e-prescribing slowed workflows and risked compliance issues.**
5. **Inaccurate and time-consuming searches for medications with duplicate entries.**
6. **Manual job application process hindered efficient recruitment.**
7. **Fragmented communication and limited control by health coaches over including doctors in patient care conversations.**
8. **Manual patient tracking led to missed follow-ups and potential gaps in care, hindering health coach oversight.**
9. **Incomplete and potentially inaccurate patient histories hampered accurate diagnoses.**
10. **Balancing legal requirements for accurate medical records with the need for doctors to update patient histories as conditions evolve.**
11. **Traditional payment structures could limit patient access due to upfront diagnostic costs.**

- Peachlyfe

Solution

1. We created a platform for patients to easily submit health questionnaires based on their needs.
2. We built a customizable, dynamic form system.
3. We built a secure dashboard for approved health coaches.
4. We integrated NCPDP SCRIPT-compliant e-prescribing through the VELA platform.
5. We developed a custom search system leveraging FDB Medknowledge and in-house filtering logic.
6. We implemented a dynamic career portal for healthcare professionals.
7. We developed a secure, HIPAA-compliant in-house messaging app with dynamic member management. Health coaches have full control over adding and removing doctors to patient conversations, ensuring efficient care coordination while maintaining patient privacy.
8. We developed a task management system with automated notifications for doctors. Health coaches can monitor these tasks, ensuring timely patient care and improved communication.
9. We implemented a self-service patient portal with medication history integration and an audit log for all changes.
10. We implemented a comprehensive audit log system for all changes to patient medical records.
11. We implemented a flexible payment system with an initial diagnostic fee followed by manageable monthly installments.

- Peachlyfe

Result

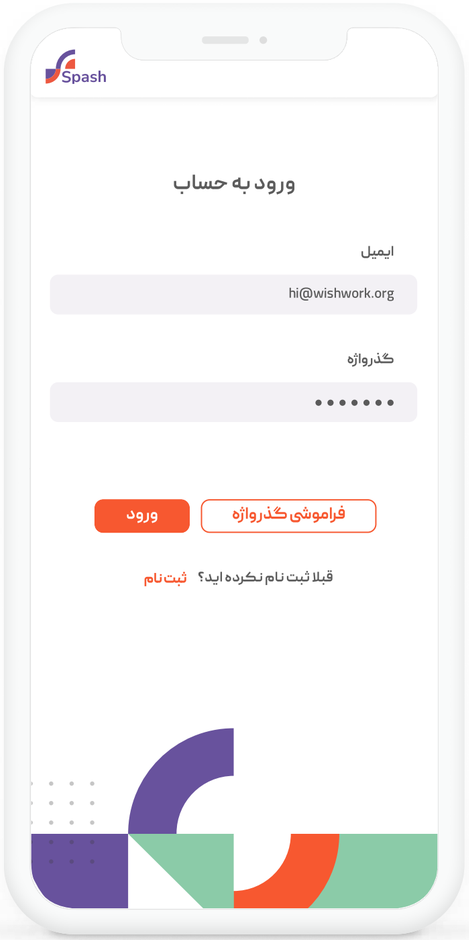

1. Doctors can quickly understand patient concerns, leading to faster diagnoses and treatment plans.
2. Admins can create adaptable questionnaires, catering to diverse patient scenarios and maximizing data collection.
3. Health coaches can monitor patient progress and personalize coaching, leading to better patient outcomes.
4. Doctors can electronically prescribe medications with a streamlined form, improving efficiency and compliance.
5. Doctors can find the right medication quickly through a clean search interface, minimizing errors and optimizing workflow.
6. Admins gain centralized access to categorized applications, streamlining review and candidate tracking.
7. This streamlines communication for all parties involved, fostering better collaboration and potentially leading to improved patient outcomes.
8. Doctors can proactively manage patient needs (refills, checkups) through a dedicated to-do list, while health coaches gain real-time visibility, fostering better care coordination and patient outcomes.
9. Patients can easily record current medications, allergies, and reactions. Pharmacy Benefit Manager (PBM) integration automatically adds prescribed medications. An audit log tracks all changes to the history, ensuring data integrity and supporting informed diagnoses by doctors.
10. Doctors can update medication and allergy information as needed while a complete record of changes, including timestamps and new values, ensures data integrity and facilitates legal compliance. Additionally, admins have full access to this audit log for further review.
11. This approach improves affordability for patients, potentially increasing participation and enrollment. Additionally, the monthly payment structure provides predictable recurring revenue for the company.

Spash: Leveraging Technology as a Space Provider Platform to Transcend in the Real State

Spash revolutionizes workspace access by connecting space providers with users on a single platform. Launched initially in various Iranian cities, Spash empowers space providers with an advanced booking system and the ability to fully customize their offerings. This empowers users to discover and book the perfect workspace for their needs, from private offices for focused work to collaborative meeting rooms. Spash caters to a diverse range of professionals, ensuring a perfect fit for every work style.

Problem

1. **Chaotic reservation management in coworking spaces leads to confusion and double bookings.**
2. **Finding and reserving the perfect workspace is a challenge for members**
3. **Coworking spaces lack control over managing their own information, including space availability and details.**
4. **Lacked a clear brand identity that effectively communicates its value proposition.**

Solution

1. **Customizable reservation dashboard shows all bookings (desks, rooms) and member details for clear space management.**
2. **Implement an intuitive reservation system within the platform, allowing members to easily search and book available desks, meeting rooms, or other spaces.**
3. **Provide spaces with a self-service portal to easily update their information.**
4. **design a strategic logo and brand identity system fostering recognition, trust & customer engagement.**

Result

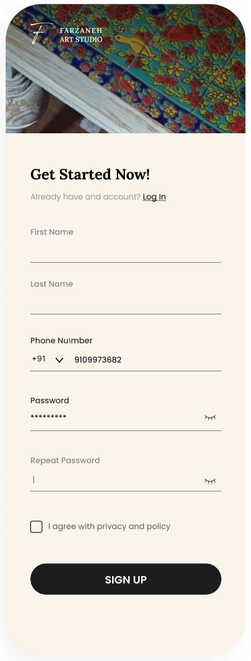

1. **Streamlined operations with increased member satisfaction through easy booking and clear availability.**
2. **Streamlined booking process empowers members to reserve their ideal workspace with ease, enhancing their overall coworking experience.**
3. **Empowers workspaces to showcase their offerings effectively and maintain accurate availability.**
4. **Create a brand identity that fosters brand recognition, builds trust, and drives customer engagement.**

Farzaneh Art Studio

Farzanehartstudio.co

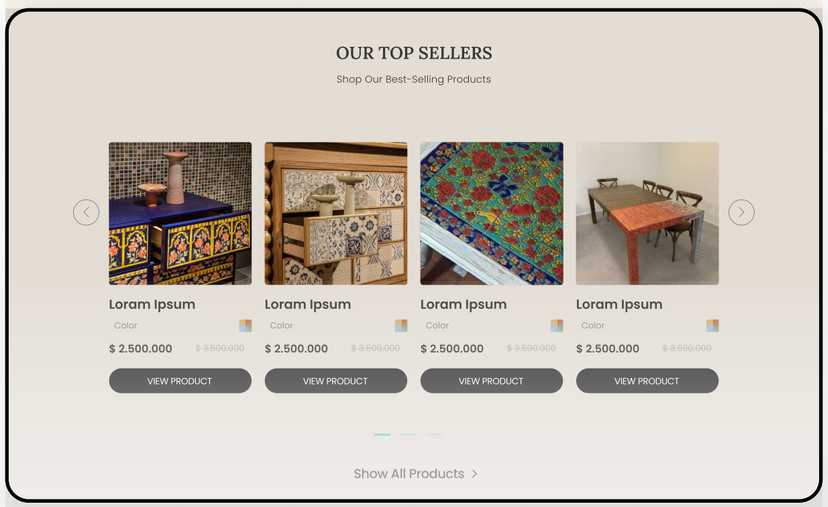

ABOUT FARZANEH ART STUDIO

My name is, Leila Farzaneh, born, raised and living in Tehran, Iran. As I went through my university studies learning about **Iran's art history** and later working with many different materials, I realized my method of delivering my art to the world is **pottery**. It is the earthy feeling of touching clay, playing and forming it that is inseparable from me and I believe humans in general. Throughout Persian culture, especially poetry, you can find many references about the cycle of life and the connection of humans to soil and clay since upon burial we turn into dust particles and renewed as another life form. This thought process became the foundation of my art. Pottery has been part of my culture for thousands of years. The techniques are perfected but **I felt there is room for expansion in other areas such as colors and design.**

Shop Our Best-Selling Products

Introducing Farzaneh Art Studio

Farzaneh Studio is a distinguished ceramics and interior design studio renowned for collaborating with prominent clients, including embassies, to provide bespoke design solutions tailored to their unique needs. Rooted in Persian culture and inspired by its rich poetic traditions, our work emphasizes the profound symbolism of the cycle of life and the intrinsic connection between humans and the earth. This philosophy reflects the transformation of human existence from dust to life, a theme deeply embedded in Persian heritage and resonant in our design ethos.

Problem

1. **Farzaneh Museum lacked a cohesive brand identity, leading to an uninspiring website with no clear style.**
2. **Their website lacked a proper classification system, making it difficult for customers to find specific products.**
3. **Unclear category paths made product discovery slow.**

Solution

1. **We developed a unique brand identity for Farzaneh Museum, including a distinct visual style and tone of voice.**
2. **We designed a user-friendly classification system allowing customers to filter products by color, material, category, price, and intended use.**
3. **Implemented a customizable, infinitely nested category system.**

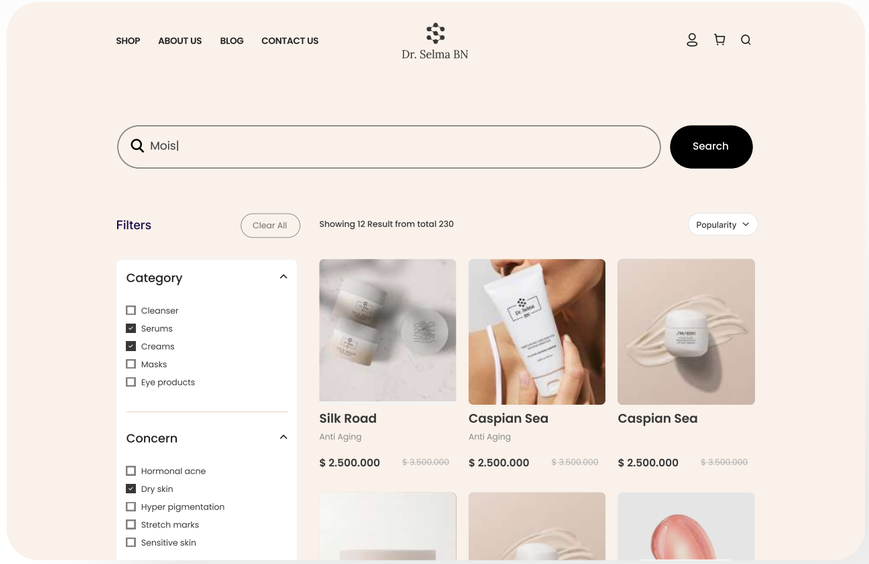

Result

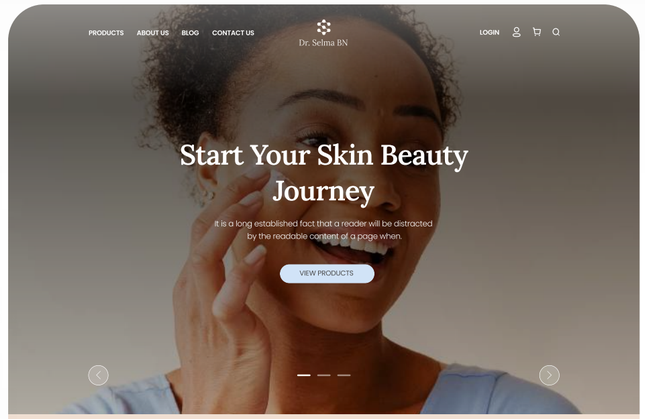

1. **Farzaneh Museum established a strong brand presence.**
2. **Customers can now easily find the products they're looking for, leading to a potential increase in sales.**
3. **Users can refine searches for faster product discovery and potentially quicker purchases.**

Introducing Dr. Selma BN

We helped Dr. Selma BN, a US based skincare brand, establish a strong online presence with a user-friendly e-commerce platform. This project involved comprehensive brand development, including creating logo concepts (études) and crafting a unique brand identity. We also designed a vast collection of icons and illustrations to visually enhance the user experience. With a cohesive brand foundation in place, we designed the e-commerce platform itself, ensuring a seamless shopping experience for Dr. Selma BN's skincare products.

Problem

- **Lack of a central resource for brand identity elements.**
- **They also lacked UX and UI design for their website.**
- **Difficulty for users to buy products quickly on the e-commerce platforms.**
- **Limited shipping options hindering sales to international customers.**

Solution

- **Developed a comprehensive brand book that established clear brand guidelines. This brand book included Brand identity guidelines and Visual identity system.**
- **Designed a user-centered UX/UI design that optimized user flows for a smooth and intuitive experience that meets user goals.**
- **Implementing guest checkout and streamlined user checkout processes with faster shopping experience.**
- **Integrated Shopify Shipping to offer a global delivery network.**

Result

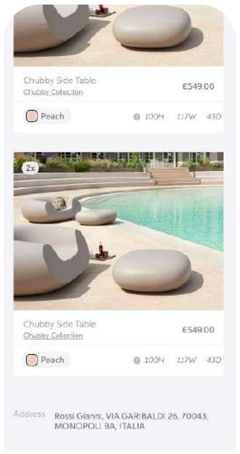

- **A cohesive and user-friendly brand book that serves as a single source of truth for maintaining brand consistency across all platforms and applications.**
- **Increased user engagement and satisfaction through a user-friendly and brand-consistent platform.**
- **Increased purchase speed. Users can buy products fast and efficient.**
- **Increased sales reach by enabling customers worldwide to order and receive products.**

Slide

Slidedesign.it

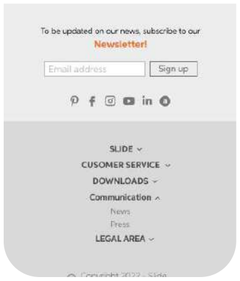

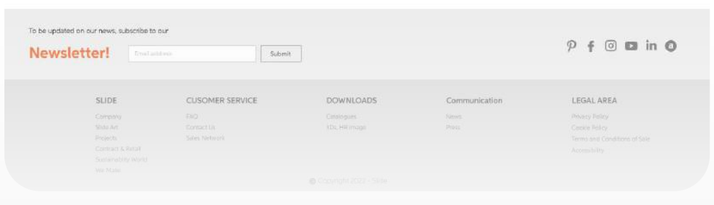

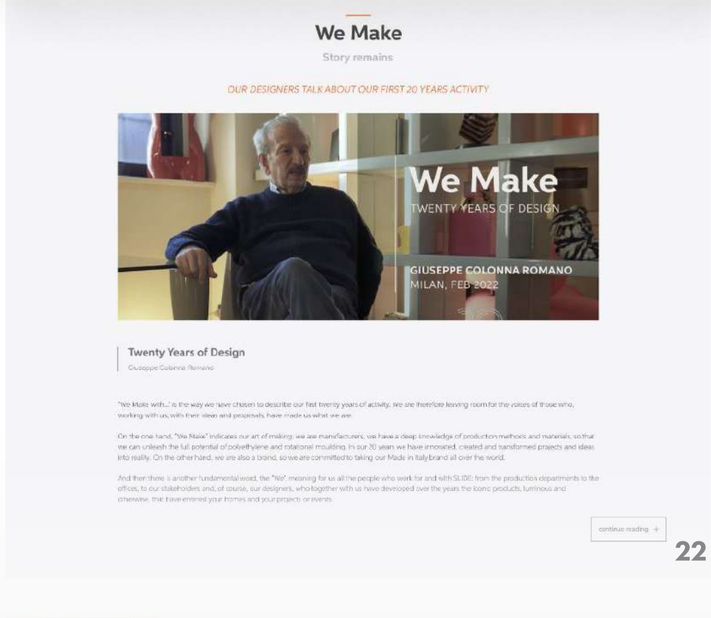

Introducing Slide

Slide is a renowned Italian company that provides a wide array of accessories, including lamps, tables, chairs, among others. Their mission is to globally promote products crafted by Italian designers. Wish Work has been instrumental in assisting them to develop a user-centric platform tailored to their specific needs. This platform boasts a multitude of complex functionalities, a feature that sets it apart in the e-commerce landscape. For instance, it necessitated an integration with Klaviyo for the distribution of flexible, complex coupons. This strategic approach has significantly enhanced the user experience and operational efficiency of the platform.

Problem

1. **Client's WordPress website design was outdated and required a refresh to improve user experience and engagement.**
2. **Clients wanted their website to offer a personalized shopping experience where users can visualize their product choices (colors, sizes, etc.) through dynamic imagery.**
3. **The client wanted a way to incentivize users, specifically rewarding them for special occasions or recognizing valuable customers.**
4. **The client's website was not ranking well for their target keywords in search engine results pages.**
5. **The client wanted a streamlined way to manage VAT charges for their customers across different European countries.**
6. **The client wanted to personalize the user experience by displaying product information relevant to the user's location.**
7. **They were unable to personalize the content and design elements to effectively capture visitor attention and drive conversions in their landing page.**

Solution

1. Conducted user research to understand the needs and behavior of the client's customers and target audience.

2. Implementing a product customization tool allowing administrators to create and manage product variations. This included associating specific images and information with different color and size options. Users will then see the most relevant product image based on their selections.

3. Implemented a user reward system with a flexible coupon management tool. This allowed administrators to create targeted coupons for specific occasions or user groups, fostering customer loyalty and engagement.

4. Implemented an on-page SEO optimization tool. This allowed administrators to easily manage and optimize website content with relevant keywords and meta descriptions for each page.

5. We implemented a geo-location VAT feature. This allowed the system to automatically determine the customer's location and apply the appropriate VAT rate based on the product being purchased and the customer's country.

6. We implemented a geo-targeting feature that leverages user location data (like IP address) to tailor product information on the website.

7. We implemented a user-friendly content management system (CMS) for the hero section of the landing page. This empowered admins to Tailor content, Customize design and Create targeted CTAs.

- Slide

Result

1. **Developed a user-centric website redesign that enhances the user experience for the client's target audience.**
2. **This solution empowerd users to make informed purchasing decisions by providing a clear visual representation of their chosen product configuration. This led to a more engaging and satisfying shopping experience.**
3. **By offering targeted rewards and promotions, users felt valued and appreciated, leading to a more positive and engaging user experience.**
4. **This attracted more qualified traffic of users genuinely interested in the client's offerings and lead to increased website engagement.**
5. **This solution automated VAT calculation, ensuring accurate charges for both the client and the customer.**
6. **By displaying geographically relevant product information, users saw content that is more likely to resonate with their needs and interests.**
7. **By providing extensive customization options for the hero section, administrators could created a visually appealing and informative first impression that aligns with specific marketing goals and events.**

Paya

Paya-int.de

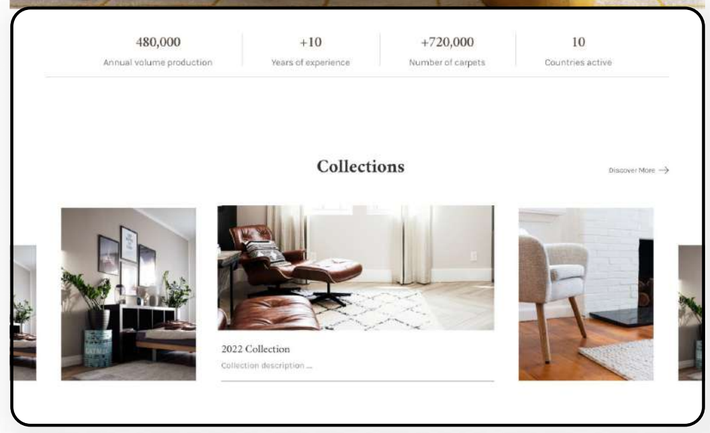

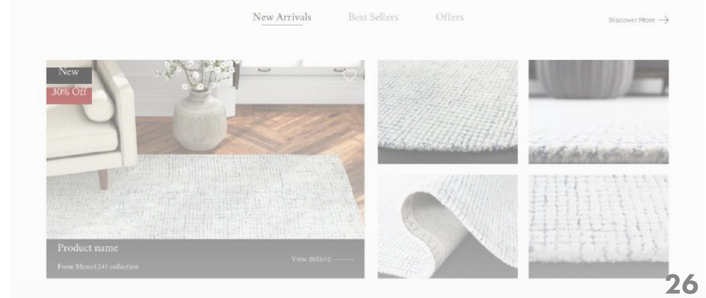

PAYA

Introducing Paya

Paya is a leading German online carpet retailer. The Paya website empowers customers to explore a curated selection of exquisite carpets, crafted with premium materials.
This project highlights our expertise in crafting visually stunning and functionally intuitive e-commerce experiences; reflecting Paya's unique style and products, captivating customers and driving sales.

Problem

1. **The client needed a user-friendly platform to showcase their extensive carpet collection and facilitate online sales.**

2. **Creating and maintaining separate catalogs for different carpet collections was a time-consuming and laborious process.**

3. **The current carpet ordering process wasn't streamlined for both wholesalers and individual buyers.**

Solution

1. **Admins can upload and enter high-quality images & details (size, color, material, origin). Customers can filter the collection and view detailed info before adding carpets to their cart & securely purchasing online**

2. **We implemented a "smart catalog" feature that automatically generates catalogs based on the carpets within a specific collection. This feature eliminates the need for manual catalog creation, saving the admin time and effort.**

3. **We implemented a differentiated ordering system. Wholesalers can enter their information first and be directed to a dedicated process for faster order placement.**

Result

1. **Visually appealing e-commerce platform for carpet seller. Easy browsing & secure purchase for customers leads to increased sales & satisfaction.**

2. **The admin can now effortlessly generate downloadable collection catalogs based on their available products, streamlining the process and improving accessibility to users.**

3. **This system allows wholesalers to quickly and efficiently place bulk orders, while individual buyers can enjoy a familiar shopping experience.**

HCR Medical Clinic

Hcr-clinik.netlify.app

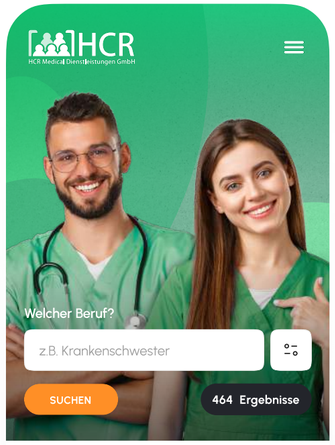

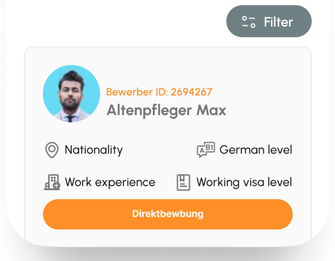

KCS in Zahlen, Daten, Fakten.

Für Alle, die Mehr über uns wissen wollen, haben wir hier ein
Milestones zusammengestellt. Ein bisschen angeben wollen
schließlich auch ;) Für Alle, die Mehr über uns wissen wollen,
wir hier ein paar Milestones zusammengestellt. Ein bisschen
angeben wollen wir schließlich auch ;)

Lebenslauf

KCS in Zahlen, Daten, Fakten.

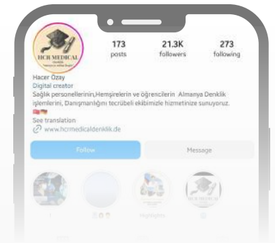

Introducing HCR Medical Clinic

HCR Klinik, is a web platform that bridges the gap for immigrant healthcare professionals in Germany. HCR Klinik empowers employers to discover diverse talent and gives immigrants the tools to showcase their expertise and experience. This visually-appealing platform goes beyond connections - it tells their stories and fosters a more inclusive German healthcare system.

Problem

1. **Qualified immigrants in Germany were struggling to find suitable employment opportunities, while employers faced difficulty finding workers with the skills they needed.**
2. **Many skilled immigrants struggle to present their qualifications effectively in a new job market, leading to difficulties getting their resumes noticed by potential employers.**
3. **The client wanted to create a visually compelling design that effectively communicated their mission statement to both potential employees and current staff.**

Solution

1. **Developing a section that connects skilled immigrants with potential employers in Germany. The platform allows admins to enter the data of immigrants with their qualifications, language skills, and visa status. Employers can search the database based on specific skills and filter by language proficiency or visa requirements.**
2. **This company allows immigrants to easily contact, create and format their resumes highlighting their skills and experience. The HCR Clinik team also offers resume review and guidance to help immigrants tailor their resumes to specific job openings.**
3. **We proposed a design approach that seamlessly blends high-quality illustrations. The illustrations would be crafted to visually represent key aspects of the HCR Clinik mission,.**

Result

1. **This section streamlines the job search process for both immigrants and employers, increasing the chances of a successful match and facilitating faster integration of skilled immigrants into the German workforce.**
2. **Easily contacted admin form that the HCR admin can reach the immigrants and put their resume in the website.**
3. **The final design effectively communicates HCR Clinik's mission statement through engaging visuals. The illustrations and photos work together to create a sense of professionalism, warmth, and the human aspects of healthcare.**

• Star Gebäudedienste GmbH

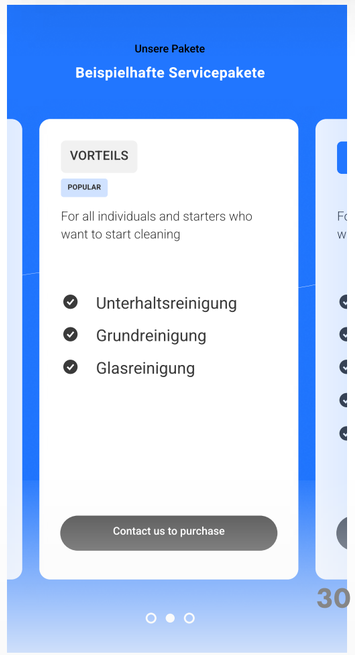

Star Gebäudedienste GmbH

star-dienste.de

Introducing Star Gebäudedienste GmbH

Star Gebäudedienste offers a wide range of cleaning services, from basic janitorial services to specialized cleaning for tasks like underfloor cleaning, solar panels, and construction sites. They use modern technologies and environmentally friendly products to ensure a thorough and healthy clean for your business. The client wanted an informative website to showcase what they do, so we started by understanding what they had in mind and start to design and develop based on the needs of the client and its customers.

Problem

1. **The client needed a website that effectively communicated their brand and services to their target audience.**
2. **The client lacked a system for notifying them about new user registrations.**

Solution

1. **We designed a website that resonates with the client's target audience by incorporating elements that align with the client's brand identity. The design was also structured to clearly showcase the client's services and make it easy for potential customers to understand what they offer.**
2. **We implemented an automated email notification system triggered by user registration.**

Result

1. **The client now has a website that is both informative and visually appealing, leading to a better user experience and increased lead generation.**
2. **The client receives immediate notification of new user registrations, allowing them to promptly welcome new users and potentially personalize their onboarding experience. This fosters a positive first impression and can lead to higher user engagement.**

Values

Maintain Forever

We are always taking care of services we have developed

Stories Matter

We are looking for businesses with soul, not just a profit motive

Architecture is the Key

We start with the customer's pain, not the technology, and conducting best possible architecture

急がば回れ

In the bustling world of technology, where innovation races against time, there's a valuable lesson to be learned from an age-old Japanese proverb: "Isogaba maware,"(急がば回れ) meaning "if you're in a rush, take the longer route." Just as travelers in ancient Japan would avoid the unpredictable ferry on Biwa Lake, choosing instead the sturdier bridge to avoid potential delays or hazards, we must not be swayed by the allure of quick fixes in the digital realm.

In business, the temptation to rush into technology solutions without careful consideration often leads to pitfalls and missed opportunities. We see companies adopting trendy tools without fully understanding their purpose or integration with existing systems, resulting in costly errors and frustration.

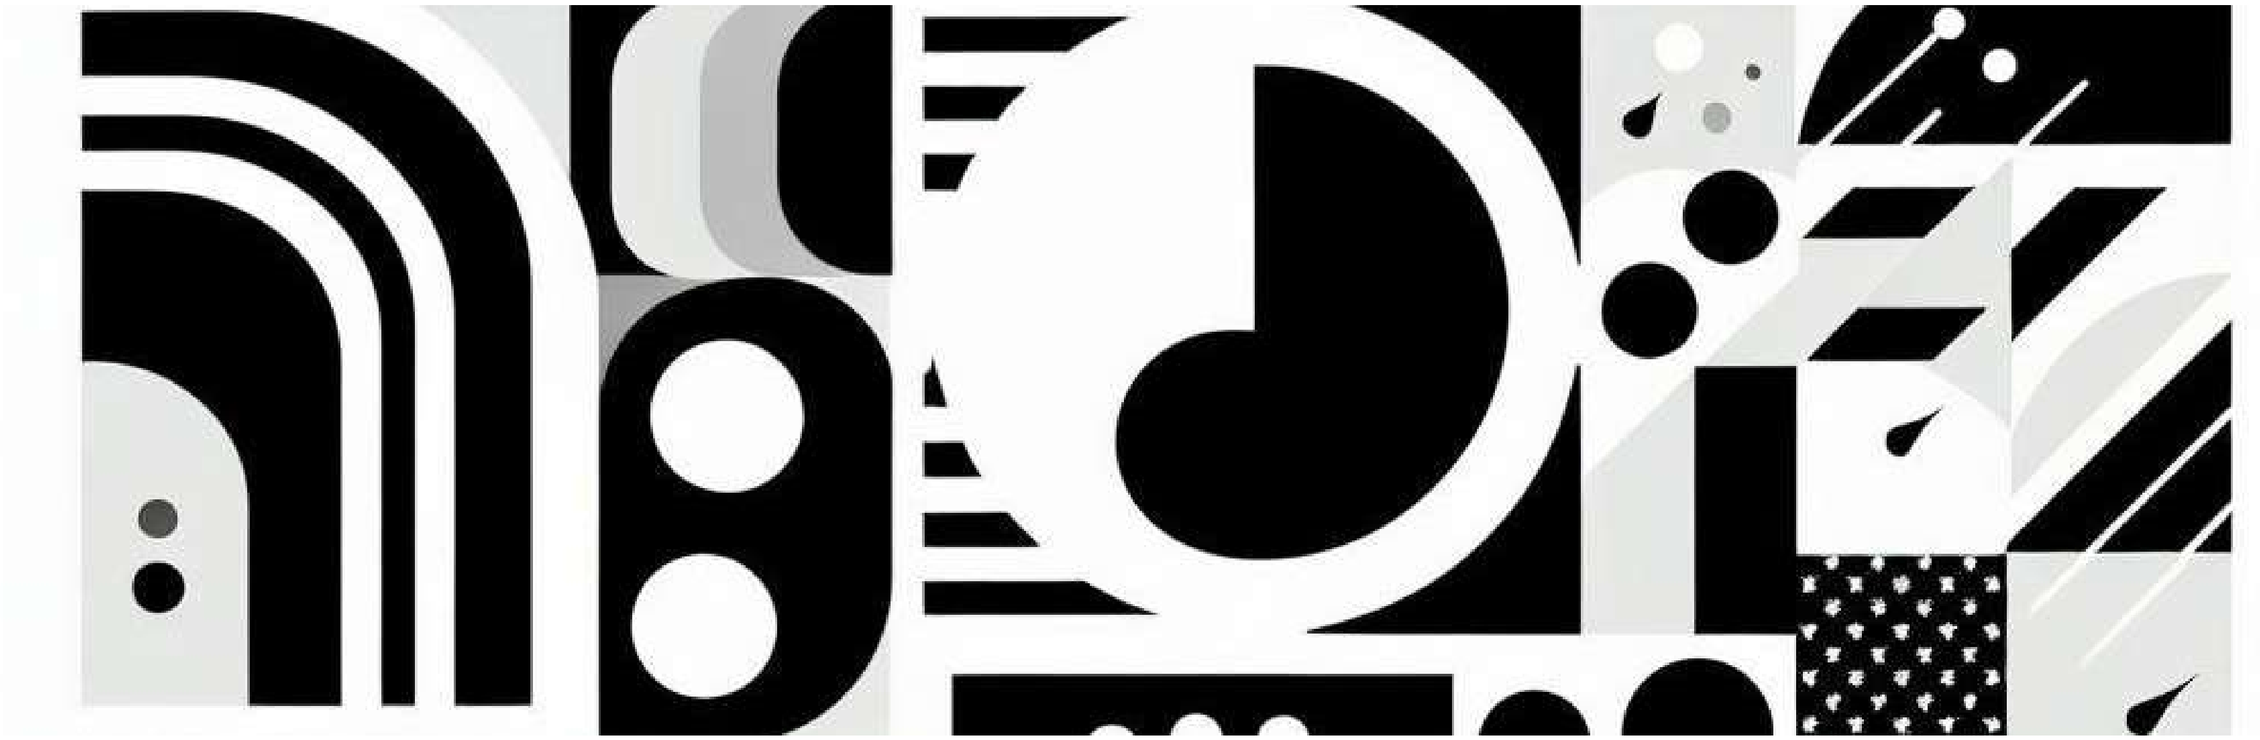

At Wish Work, we believe in the wisdom of the proverb "isogaba maware." We are not about speed or shortcuts; we are about building enduring partnerships with businesses that share our commitment to ethical and sustainable growth.

Just as the bridge over Biwa Lake provided a reliable and safe passage, we guide businesses through the complexities of the digital landscape, ensuring they leverage technology in a way that aligns with their values and long-term goals. We are not here to sell fleeting solutions; we are here to empower businesses to build trusted networks that will stand the test of time.

In a world where technology can be both a catalyst for progress and a source of deception, we are the beacon of hope for businesses seeking to harness its power without compromising their integrity. We are the trusted guides, the ethical innovators, the architects of a future where technology serves as a force for good, propelling businesses to new heights and fostering a more just and equitable society.

We are Wish Work, and we are here to get there, together.

- Values

The future is a non-deterministic problem (NP). In many ways, businesses try to convince others that they believe in something they don't. We live in an era where it's difficult to distinguish fact from fiction. Sometimes we're even misled by images in the media. Sources are not always acting responsibly, and this is dangerous. We are a technology company. We understand the importance of truth and responsibility. Or at least, we try to. We constantly research emerging technologies, not just for fun, but also to warn others not to fall into traps. We want to make technology accessible for the good of humanity, and we know it's a tough task. It's harder than you might imagine because, for every path to salvation, there are ten paths to destruction. As pioneers in the field of technology, we hope to be a trusted partner, expanding the boundaries of technology to serve humanity, not the other way around. This is our vision, and we are working towards it tirelessly.
